ENHANCED INTEGRATED FRAMEWORK

The EIF is a global partnership that is dedicated to supporting the Least Developed Countries (LDCs) to use trade as a tool for economic growth and poverty reduction through job and income opportunities. The EIF empowers LDCs to identify where and how trade can form an integral part of their national development strategies and assist them in harnessing Aid for Trade towards this objective.

The EIF provides country specific and customized support that addresses the full suite of trade capacity building needs. Through building trade capacity, the partnership works together to support the LDCs' own drive to:

- identify and address the priority constraints to trade;
- ensure trade directly supports the national development agenda;
- set up institutional and coordination mechanisms for trade related technical assistance;
- initiate policy reform and mobilize additional financial and technical resources to address priority trade needs.

INTERNATIONAL TRADE CENTRE

ITC is a multilateral agency fully dedicated to developing the international competitiveness of SMEs. As a joint agency of WTO and UN, ITC focuses on small business export success. ITC works especially in least developed countries, land-locked developing countries, fragile and post-conflict countries, Small Island Developing States and sub-Saharan Africa. We help to build vibrant, sustainable export sectors that provide entrepreneurial opportunities, particularly for women, young people and poor communities.

Focus areas for SME competitiveness include:

- Developing trade and market intelligence
- Building a conducive business environment
- Strengthening trade and investment support institutions
- Connecting to value chains
- Supporting regional integration and South-South linkages
- Mainstreaming inclusive and green trade

UNITED NATIONS CONFERENCE ON TRADE AND DEVELOPMENT

UNCTAD, which is governed by its 194 member States, is the United Nations body responsible for dealing with development issues, particularly international trade – the main driver of development. Its work can be summed up in three words: think, debate, and deliver. Reflection on development is at the heart of UNCTAD's work. It produces analyses that form the basis for recommendations to policymakers. UNCTAD is also a forum where representatives of all countries can freely engage in dialogue and discuss ways to establish a better balance in the global economy. In addition, UNCTAD offers direct technical assistance to developing countries and countries with economies in transition, helping them to build the capacities they need to become equitably integrated into the global economy and improve the well-being of their populations.

UNCTAD holds a ministerial-level meeting every four years to discuss major global economic issues and to decide on its programme of work. Every two years, UNCTAD organizes the World Investment Forum, which brings together major players from the international investment community to discuss challenges and opportunities and to promote investment policies and partnerships for sustainable development and equitable growth.

INTERNATIONAL TELECOMMUNICATIONS UNION

ITU is the leading United Nations agency for information and communication technologies (ICTs), driving innovation in ICTs together with 193 Member States and a membership of nearly 800 private sector entities and academic institutions. Established over 150 years ago in 1865, ITU is the intergovernmental body responsible for coordinating the shared global use of the radio spectrum, promoting international cooperation in assigning satellite orbits, improving communication infrastructure in the developing world, and establishing the worldwide standards that foster seamless interconnection of a vast range of communications systems. From broadband networks to cutting-edge wireless technologies, aeronautical and maritime navigation, radio astronomy, oceanographic and satellite-based earth monitoring as well as converging fixed-mobile phone, Internet and broadcasting technologies, ITU is committed to connecting the world.

BUSINESS FOR eTRADE DEVELOPMENT

The research presented in the paper by Kati Suominen is ideated and produced by her firm Nextrade Group. She is also Founder and Interim Executive Director of Business for eTrade Development and authored this chapter in that capacity. Business for eTrade Development has been launched alongside the UNCTAD-led eTrade for All initiative as a private sector voice to help developing country governments, international agencies, and leading donors optimize public policies and aid allocations for ecommerce development and cross-border ecommerce worldwide.

WORLD BANK GROUP

The World Bank Group has set two goals for the world to achieve by 2030: end extreme poverty by decreasing the percentage of people living on less than \$1.25 a day to no more than 3%; and promote shared prosperity by fostering the income growth of the bottom 40% for every country. In the area of trade and competitiveness, the World Bank Group helps countries achieve these two goals through rapid and broad-based economic growth, centred on strong contributions from the private sector. The World Bank Group is working in this area to help countries expand the volume and value of trade, enhance the investment climate, improve competitiveness in sectors, and foster innovation and entrepreneurship.

WORLD TRADE ORGANIZATION

The World Trade Organization (WTO) is the only global organisation dealing with the rules of trade between nations. At its heart are the WTO agreements, negotiated and signed by the bulk of the world's trading nations and ratified in their parliaments. The goal is to help producers of goods and services, exporters, and importers conduct their business.

The WTO's main activities are to:

- negotiate the reduction or elimination of obstacles to trade (import tariffs, other barriers to trade) and agreeing on rules governing the conduct of international trade (e.g. antidumping, subsidies, product standards, etc.)
- administer and monitor the application of the WTO's agreed rules for trade in goods, trade in services, and trade-related intellectual property rights
- monitor and review the trade policies of its members, as well as to ensure transparency of regional and bilateral trade agreements
- settle disputes among its members regarding the interpretation and application of the agreements
- build capacity of developing country government officials in international trade matters
- assist the process of accession of some 30 countries who are not yet members of the organization
- conduct economic research and collecting and disseminating trade data in support of the WTO's other main activities
- explain to and educate the public about the WTO, its mission and its activities.

The WTO currently has 164 members, with more than two-thirds developing economies or separate customs territories.
