

ANNEX 2

Presentations of FDI Statistics

462. The *Benchmark Definition* recommends two types of standard presentations for the dissemination of foreign direct investment (FDI) statistics, one according to the *assets/liabilities principle*, and the other according to the *directional principle*. In addition, further analyses of direct investment are to be reported on a supplemental (voluntary) basis but their reporting is strongly encouraged. Overall, the presentations for direct investment statistics recommended by this *Benchmark Definition* can be summarised as follows:

1. Standard FDI statistics

- i) **FDI aggregates for macro-economic statistics** (according to the assets/liability principle)
 - a) Positions in Asset/liabilities of FDI.
 - b) Transactions in Asset/liabilities of FDI.
 - c) FDI income debits/credits.

Memorandum item: FDI aggregates for resident SPEs

- ii) **FDI Statistics** (according to the *directional principle*)
 - a) Inward/Outward FDI positions
 - 1. Excluding resident SPEs
 - by partner country,
 - by industry.
 - 2. Resident SPEs
 - by partner country,
 - by industry.
 - b) Inward/Outward FDI financial flows (inflows/outflows)
 - 1. Excluding resident SPEs
 - by partner country,
 - by industry.
 - 2. Resident SPEs
 - by partner country,
 - by industry.

c) FDI income: receivables/payables

1. Excluding resident SPEs

- by partner country,
- by industry.

2. Resident SPEs

- by partner country,
- by industry.

2. Supplemental FDI statistics (according to the directional principle)**i) FDI Statistics (excluding resident SPEs and looking through non-resident SPEs)**

a) Inward/Outward FDI positions

- by partner country,
- by industry.

b) Inward/Outward FDI financial flows (inflows/outflows)

- by partner country,
- by industry.

c) FDI income: receivables/payables

- by partner country,
- by industry.

ii) Mergers and Acquisition for FDI equity flows

a) Inward/Outward FDI financial flows

- by partner country (or regions),
- by industry.

iii) Inward FDI positions according to Ultimate Investor Country

a) by partner country,

b) by industry.

3. Supplemental FDI statistics (according to the directional principle recommended in the 3rd Edition of the Benchmark Definition –)⁵⁶

a) Inward/Outward FDI positions

- by partner country,
- by industry.

b) Inward/Outward FDI financial flows (inflows/outflows)

- by partner country,
- by industry.

c) FDI income: receivables/payables

- by partner country,
- by industry.

56. These series are required according to the standards defined in the 3rd edition of the *Benchmark Definition of Foreign Direct Investment* in which the compilation of investment on a directional basis was limited to offsetting any reverse investment (by a direct investment enterprise in its direct investor).

Box A.2.1 Sign convention

In presenting the various tables of FDI data, compilers should note that the **sign convention** required is as follows:

FDI positions

FDI positions presented on an assets/liabilities basis should be shown so that increases in either are shown with a positive (+ve) sign and decreases with a negative (-ve) sign. The net position should be derived arithmetically as

$$\text{Net FDI position} = \text{FDI assets} - (\text{minus}) \text{FDI liabilities}$$

FDI positions presented on a directional basis should follow the same sign convention, i.e. increases in Outward FDI or in Inward FDI are shown with a positive (+ve) sign and decreases with a negative (-ve) sign. The net position should be derived arithmetically as

$$\text{Net FDI position} = \text{outward FDI} - (\text{minus}) \text{inward FDI}$$

Note: The net FDI position for both presentations should be the same (where the coverage is identical).

FDI financial flows

The sign convention described for FDI positions applies also to FDI financial flows.

FDI income flows

For the compiling economy, FDI income inflows are shown as positive (+ve) credits and income outflows are shown as positive (+ve) debits. The net income flow should be derived arithmetically as:

$$\text{Net FDI income} = \text{FDI income credit} - (\text{minus}) \text{FDI income debit.}$$

Notes: Readers, especially compilers and users are urged to take note that the sign convention recommended in this Benchmark Definition differs from that recommended in the BPM6 and caution is necessary in interpreting the results from both standards.

463. The structure and content of the specific FDI series required are described below. In generating the tables, compilers are requested to report the data using the sign convention described in Box A.2.1.
