

## Slovenia

The two Slovenian regions are in the top 30% of the OECD regions in the education dimension and in the bottom 20% in the civic engagement dimension. The widest disparities between the two regions are found in the health and jobs dimensions; with regards to the health dimension, Western Slovenia is in the top third of the OECD regions, while Eastern Slovenia is in the bottom third.

### Relative performance of Slovenian regions by well-being dimensions

*Note:* Relative ranking of the regions with the best and worst outcomes in the 9 well-being dimensions, with respect to all 362 OECD regions. The nine dimensions are ordered by decreasing regional disparities in the country. Each well-being dimension is measured by the indicators in the table below.

Most of the well-being indicators in Slovenia have values similar to the OECD average. Slovenian regions outperform the OECD average in the share of labour force with at least a secondary degree and the households with broadband connection. On the other hand, Slovenian regions fare worse than the OECD average in the number of voters in the last election, air pollution and household disposable per capita income.
