ANNEX A

LIST OF TABLES AVAILABLE ON LINE

The following tables are available in electronic form only.

Chapter 1 Who and where are the low-performing students?

http://dx.doi.org/10.1787/888933318324

- Web Table 1.1 Percentage of students above and below baseline in mathematics, reading and science
- Web Table 1.2 Percentage of students at or below Level 1 in mathematics, reading and science
- Web Table 1.3 Overlapping of low performance across subjects
- Web Table 1.4 Percentage of students below Level 1 in one or more subjects
- Web Table 1.5 Percentage of students below baseline in one, two or three subjects
- Web Table 1.6 Percentage of students who are low performers or score below Level 1 in at least one subject
- Web Table 1.7a Absolute number of low performers in mathematics, reading and science (Part 1/2)
- Web Table 1.7b Absolute number of low performers in mathematics, reading and science (Part 2/2)
- Web Table 1.8 Absolute number of low performers and students who score below Level 1 in all three subjects or in at least one subject
- Web Table 1.9 Percentage of low performers in mathematics in PISA 2003 through 2012
- Web Table 1.10 Percentage of students who score below Level 1, at Level 1 or at Level 2 in mathematics in PISA 2003 through 2012
- Web Table 1.11 Percentage of low performers in reading in PISA 2000 through 2012
- Web Table 1.12 Percentage of low performers in science in PISA 2003 through 2012
- Web Table 1.13 Relationship between student low performance and mean mathematics scores across countries and schools
- Web Table 1.14 Low performers in mathematics by quintile of performance within country/economy

Chapter 2 Student background and low performance

http://dx.doi.org/10.1787/888933318331

- Web Table 2.1 Students’ socio-economic status and low performance in mathematics
- Web Table 2.2 Students’ socio-economic status and the likelihood of low performance in mathematics
- Web Table 2.3a Gender and low performance in mathematics, reading and science (Part 1/2)
- Web Table 2.3b Gender and low performance in mathematics, reading and science (Part 2/2)
- Web Table 2.4 Gender and low performance in mathematics, reading, science and in all subjects, by proficiency level
- Web Table 2.5 Gender and the likelihood of low performance in mathematics
- Web Table 2.6 Immigrant status and low performance in mathematics
- Web Table 2.7 Immigrant status and the likelihood of low performance in mathematics
- Web Table 2.8 Language spoken at home and low performance in mathematics
- Web Table 2.9 Language spoken at home and the likelihood of low performance in mathematics
- Web Table 2.10 Family structure and low performance in mathematics
- Web Table 2.11 Family structure and the likelihood of low performance in mathematics
- Web Table 2.12 Geographic location and low performance in mathematics
- Web Table 2.13 Geographic location and the likelihood of low performance in mathematics
- Web Table 2.14 Attendance at pre-primary school and low performance in mathematics
- Web Table 2.15 Attendance at pre-primary school and the likelihood of low performance in mathematics
- Web Table 2.16 Grade repetition and low performance in mathematics
- Web Table 2.17 Grade repetition and the likelihood of low performance in mathematics
- Web Table 2.18 Programme orientation and low performance in mathematics
- Web Table 2.19 Programme orientation and the likelihood of low performance in mathematics
- Web Table 2.20 Likelihood of low performance in mathematics, by students’ socio-economic, demographic and education background
- Web Table 2.21 Probability of low performance in mathematics across risk profiles, by students’ socio-economic status
- Web Table 2.22 Percentage of all low performers in mathematics from specific socio-economic, demographic and education groups

Chapter 3 Engagement, motivation and self-confidence among low performers

http://dx.doi.org/10.1787/888933318342

- Web Table 3.1 Student truancy and low performance in mathematics
- Web Table 3.2a Skipping school and low performance in mathematics
- Web Table 3.2b Skipping some classes and low performance in mathematics
- Web Table 3.2c Arriving late for school and low performance in mathematics

...
Chapter 4 How school characteristics are related to low performance

http://dx.doi.org/10.1787/888933318354
ANNEX A: LIST OF TABLES AVAILABLE ON LINE

| Table 4.22 | Quality of educational resources in school and low performance in mathematics |
| Table 4.23 | Quality of educational resources in school and the likelihood of low performance in mathematics |
| Table 4.24 | Teacher shortage and low performance in mathematics |
| Table 4.25 | Teacher shortage and the likelihood of low performance in mathematics |
| Table 4.26 | School type and low performance in mathematics |
| Table 4.27 | School type and the likelihood of low performance in mathematics |

Chapter 5 Policies governing school systems and low student performance

http://dx.doi.org/10.1787/888933318365

| Table 5.1 | Socio-economic inclusion and low/top performance in mathematics |
| Table 5.2 | School resources and low/top performance in mathematics |
| Table 5.3 | School governance, assessments and accountability and low/top performance in mathematics |
| Table 5.4 | Sorting and selecting students and low/top performance in mathematics |
